damit Gutes wertvoll bleibt.

Application technology

Know-how of a longtime market leader in the temporary corrosion protection sector combined with state in the art technology

■ Product characteristics

The BRANOsience business unit provides the know-how of a longtime market leader in the temporary corrosion protection sector.

Our experienced employees and state in the art technology will help you on site to protect your high-quality products safely during manufacturing, transport or storage.

We will support you in developing and optimizing of transport- and storage packaging. The in-house laboratory offers the option of using analytical causal research.

You are also able to draw upon multifaceted testing options of the analytic sector, where transport simulations are going to be accomplished in programmable conditioning cabinets.

■ Advantages

- on site in your company
- Custom-designed consulting
- Packaging consulting
- Packaging tests
- Transport monitoring
- storage-/transport simulations
- Causal research
- Verifying the process chain
- DIN EN/ISO 9001
- DIN EN/ISO 14001
