

Baking release paper

CU 2 / U 2

■ BRANOfood

Separation and shaped papers for the food industry

■ Characteristics

Dual-sided baking paper based on bleached (CU 2) or unbleached (U 2) grease-proof paper, 41 g/m².

With **standard siliconisation to achieve average release effect properties.**

Unprinted.

■ Application

A baking paper for la great range of cakes and biscuits requiring standard release properties (not for savoury lye snacks).

Used as a dividing paper in the meat, cheese and confectionary industries; for caterers and restaurants.

For baking, roasting, steaming, freezing and dividing.

Suitable for temperatures of up to 220°C. The baking paper can be used several times.

The baking paper makes working clean and efficient, because there are no more trays or shapes to clean, . Even sticky and frozen goods can be removed incredibly easy from the paper. No more sticking thanks to the coating.

We recommend covering as much of the paper as possible when baking. Non-covered paper browns more quickly and becomes brittle.

■ Advantages

- Environmentally friendly material
- Good release effects
- Multifunctional
- Clean and efficient working
- Eliminates necessity to clean baking tray
- Complies with current recommendation XXXVI / 2 of the Federal Institute for Risk Assessment (BfR).
- Represents no health hazards
- Easily disposed off
- BRANOpac is certified according to ISO 9001 and ISO 14001.
- HACCP approved

Baking release paper

Product Information
