BRANOfritt MF 80

Snack Paper

BRANOfood

Separation and baking papers for the food industry

Characteristics

Dual-sided siliconised, slightly creped filter paper, based on a 100% sulphate cellulose product, approx. 86 g/m² and approx. 60 g/m².

With **special siliconisation suitable for preparing a large number of oven snacks**.

Blank paper.

Application

Can be used as a **baking grill substratum** in the preparation of a large number of finger and convenience foods, oven snacks and deep-frozen products such as French fries, roast potatoes, chicken wings, cheese sticks etc.

This filter paper has been designed to soak up excess fat during the baking process. Baking in this way can reduce the amount of fat in foods by up to 20%.

Thanks to its special coating, snacks can be removed easily and residue-free.

Suitable for temperatures of up to 220°C. The baking paper is a multifunctional product.

When used as a **dividing paper in the meat industry**, BRANOfritt will soak up any juices escaping from the meat and can be removed easily thanks to its special coating.

Provides an ideal substratum for trays intended for supermarket displays.

Advantages

- Environmentally friendly material
- Suitable for a healthy and fat-reduced diet
- Fat absorbing. Suitable for oven snacks.
- Excellent release effects
- Provides an ideal substratum for trays
- Complies with current recommendation XXXVI / 2 of the Federal Institute for Risk Assessment (BfR).
- Represents no health hazards
