

BRANOkont K

Contact Protection Paper

■ BRANOGuard

Temporary corrosion protection for the automotive, mechanical engineering and metal processing industries.

■ Characteristics

BRANOkont K anticorrosion paper is a specially coated contact protection paper. It only works in direct contact with metal and possesses no effect at a distance.

Metal parts which are to be protected from corrosion during transport or storage are wrapped in BRANOkont paper. BRANOkont can also be used as interlayer. Important is the direct contact with the metal.

■ Range of Protection

Main application area: steel and cast iron.

BRANOkont is compatible with: chromium, pure tin and aluminium.

Be careful with cadmium, zinc, nickel, lead, soldering tin, magnesium, wolfram and molybdenum.

In case of doubt, please contact your application specialist.

■ Application

BRANOkont products are to be used as described above. Otherwise, no responsibility for caused damages can be taken.

■ Advantages

- Environmentally friendly corrosion protection based on paper.
- Metal parts are ready for use at any time
- Oiling and greasing aren't necessary anymore
- Economy of time
- Simple disposal
- Low package requirements
- In accordance with TRGS 615
- Marked with the Resy label
- Represents no health hazard
- BRANOpac is certified according to ISO 9001 and ISO 14001.

BRANOkont K

Product Information
