

# BRANOral B60

## Anticorrosion Additive

### ■ BRANOguard

Temporary corrosion protection for the automotive, mechanical engineering and metal processing industries.

### ■ Characteristics

Watery active substance for using as additive for watery operating or cleaning liquids. It is nitrite-free and contains no silicone or hydrazine. BRANOral B60 prevents corrosion on metal components after cleaning.

### ■ Application and Dosage

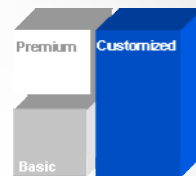

The application concentration usually constitutes 2 to 6a % by weight. If BRANOral B60 is added to other liquid substances, it should be scrutinized for compatibility.

### ■ Range of Protection

Iron, steel and cast iron

### BRANOpac Solutions with System

According to your requirements, you have the choice between three BRANOpac solutions: BRANOpac Basic, Premium or Customized.

**BRANOpac**  
Solutions with System

# BRANOral B 60

## Product Information

### ■ Delivery Forms

Containers of 10, 20 and 200 litres

### ■ Disposal

BRANOral B 60 has been designed for very diluted application. Watery waste from such rinsing processes (when the product has been diluted with a great deal of water) can be introduced into the waste water disposal system, provided that this is not prevented by other contamination or local authority regulations.

### ■ Operation Safety

BRANOral B 60 is a hazardous formulation as defined in the hazardous materials ordinance. It is flammable (R 10). Further information can be obtained from the safety data sheet.

<b>Technical Details</b>	Colour	yellowish, transparent
	Odour:	slightly alcoholic
	Density at + 20 °C:	1,13 g/cm <sup>3</sup>
	Flash point:	42 °C
	pH:	approx. 8
	Miscibility:	Can be freely mixed with water

The information given is in line with current state of knowledge, is non-binding and might have to be adjusted to meet local requirements. No liability is accepted for this information. Please contact us in case of doubt.
